five Per Cent of Command Ill with Malaria Resulting from Exposure and Insufficient Food.

Washington, Aug. 5 .- General Shaftr has telegraphed the president regarding the publication of the "round robin," signed by the general officers of his command, as follows: "I can very readily see what intense excitement the publication must have occasioned; a great deal more than the situation warranted. The situation is greatly aggra-vated from the fact that before any of the men were taken ill, they were thoroughly exhausted. At least 75 per cent of my command had been down with malarial fever, from which they recover slowly and are in no condition to stand an attack of yellow fever or dysentery. If they were placed here now in the condition in which they were when they came here, I do not believe they would

be in any particular danger. The regiment of immunes that recently arrived is not suffering at all and I do not believe they will. They can keep out of the sun and are well clothed and well fed. What put my command in its present condition was the 20 days' campaign when they had nothing but meat, bread and coffee without a change of clothes and without any shelter what-ever during a period twice as stormy as t has been since the surrender.

Fresh troops reaching here in the middle of August with good camps, good water and with an abundance of tentage which they will find here, need not apprehend serious danger. I thank you for the high regard in which you hold my command and your value of the service they rendered. It pays for all the suffering we endured. Generals Wheeler, Lawton, Bates and Kent concur with me in the view expressed

MRS. PINKHAM'S ADVICE.

What Mrs. Nell Hurst has to Say About It.

DEAR MRS. PINEHAM: - When I wrote to you I had not been well for five years; had doctored all the time but got no better. I had womb trouble very bad. My womb pressed backward, causing piles. I was in such misery I could scarcely walk across the floor. Menstruction was irregular and too pro-

fuse, was also troubled with leucorrhœa. I had given up all hopes of getting well; everybody thought I had consumption. After taking five bottles of Lydia E. Pink-

I cannot thank you enough for your advice and your wonderful medicine. Any one doubting my statement may write to me and I will gladly answer all inquiries.-Mrs. NELL HURST, Deepwater, Mo.

Letters like the foregoing, constantly being received, contribute not a little to the satisfaction felt by Mrs. Pinkham that her medicine and counsel are assisting women to bear their heavy
